Is there any way to stop LIFX smart bulb?

2019/09/01

Hi there, Harry! I'd install those bulbs at my home myself. They are really perfect. LIFX is a Wi-Fi enabled smart LED light bulb and you can control it with your smartphone. You can adjust its brightness, colour and you can use various timers so they will turn off and on when you need them. Another interesting option here is that that they can slowly fade off when you go to sleep and automatically increase light when you wake up. You should also know that you can set them to turn off when you leave the house and turn on when you are coming. As I've already said most of their options are available from your smartphone or tablet, but you can also use your old master switches too. LIFX also can visualize your music and that is perfect for home parties. But someone may use Wi-Fi protocol vulnerabilities to take control over those bulbs and make pranks. You should know that LIFX has started as a kickstarter project and those bulbs won't be shipped until March 2013, so you are safe till that time. But when those bulbs come to your neighbour's house you will surely be ready with one of Jammer Store Company's solutions. As I've already said those bulbs are connected with the smartphone via Wi-Fi and it is really easy to block their communications. As long as the distance between two houses is rather big for a portable jamming device you'll need a powerful, stationary Wi-Fi signal blocker to stop LIFX smart bulbs visualization option. Thanks for your question, I hope I've managed to help.
